

Standard Loaded Lip Seals

Standard type Loaded Lip Seals can be used as rod or piston seals and are basically square in configuration. They are manufactured from high quality 90 durometer polyurethane. They are also available in other materials; consult sales office for price and availability.

No Cheap Net Molded Copies

Our loaded lip seals and wipers are injection molded from engineered thermoplastic compounds, then knife-trimmed to create a sharp lip. Although it may be hard to see, a net molded seal leaves a small amount of flash that allows dirt or a film of fluid to pass by. The longer the mold is run, the more flash is created. Flash is eliminated from our seals during the trim operation.
