

Urethane Rod U-Cups

UNR series urethane u-cups are non-symmetrical in design and are meant only to be used for reciprocating hydraulic rod applications. They are manufactured slightly larger in diameter than nominal dimensions. This ensures a tight fit when snapped into the groove. Good stability and decreased heel drag resulting in lower friction are the prime features of this seal.

Temperature: -65F to 200F

Pressure: 0 to 5000 psi
